

DAVID BERGMAN

a@bergmandavid.com | (215) 936-7902 | github.com/davidbergman256

EDUCATION

Massachusetts Institute of Technology

Expected 2030

Undergraduate, undeclared major · Cambridge, MA

Academic interests: architecture, computer science, and artificial intelligence.

EXPERIENCE

PH Architect | Architecture Intern

June–July 2025

- Assisted with reviews of client proposals and attended client meetings to observe project discussions and client feedback.
- Supported day-to-day administrative and office tasks.

SELECTED PROJECTS

Globalink / Moid | Meetup Platform

2025

Leangap summer program; subsequent visual identity work

- Built a meetup coordination web application during Leangap, with user registration, onboarding, and an event dashboard using TypeScript, React, Next.js, and PostgreSQL.
- Designed the subsequent Moid visual identity and website concept in Figma and Canva, using film-inspired imagery, handwritten elements, and an informal layout.

Wave House | Architectural Design and Models

Sept.–Nov. 2025

- Designed a 142-square-foot house concept with two wave-shaped roof forms defining living and studio spaces; explored curved walls through drawings and ceramic studies.
- Constructed a separate 1:20 architectural model using MDF, plexiglass, and ceramic, incorporating a sculptural workspace within a domestic setting.

Loomplane | Open-Source Developer Tool

TypeScript, Node.js, SQLite

- Developed a prototype for sharing versioned decisions and project context across parallel AI coding agents, with dependency tracking to flag outdated assumptions.
- Provided command-line, local API, and MCP interfaces for publishing and retrieving context.

Dorm Common Room | Spatial Redesign

Oct. 2025

- Sketched and implemented a common-room redesign, rearranging furniture into activity areas and adding games and shared amenities to encourage informal interaction.

TOOLS AND METHODS

Software projects: TypeScript, React, Next.js, Node.js, PostgreSQL, SQLite.

Design: Figma, Canva, architectural sketching, physical modelmaking, ceramics.

Architecture and design portfolio available on request.
